Creating a New Custom Curriculum (without Rich Media content)

This manual shows the basics of creating a new custom curriculum. For more details on editing and enhancing your master curriculum with Rich Media Content including videos, see the manual: PLSIS – PLS Dimensions¹⁾

How do I get there? **Teacher Pages>Manage Curriculum**

Part 1: Module by Module Creation

You will see any curriculum you've already created or are already using with your students in a list. Click on the  to start the process for your new curriculum. If you just want to edit an existing curriculum, click "Edit Content" to the right of the curriculum name. Then jump to Step 1 - #2 in this manual.

1. Name the curriculum. The curriculum name you create should make this curriculum easy

to find in a list at a later time. Names such as English 9 or 7 Language Arts are typical but not as good as English 9 (JSmith 15-16) or 7-8 - Science - Company Name (2016)which notes the author of the curriculum and the school year it was created.

2. Choose a curriculum category
3. Check the State and/or Common Core Standards this curriculum will refer to.
4. Grade levels refer to which standards will be available when creating the curriculum..
5. Your name will show as the owner. Depending on your permissions in the system, you may change the course owner.
6. Note any textbooks or other pertinent information you may want to refer to later.
7. Checking HIDE prevents the course from being available to use in the system.

Either **Save & Exit** your curriculum folder to go back to the main list of all curriculum, or click **Save, Edit Curriculum** to go directly to start creating your curriculum.

You can always click on the [Edit Properties](#) from the main list to change/edit your curriculum folder or to delete.
