In this view, two reporting periods are showing because of the date range chosen at the top of the page.

- o Att: Allows you to take attendance for all students on your roster in one view.
- o LL: Allows you to print a learning log for all students on your roster at one time. When you click on a log you must choose your options from the pop up and then “print logs.”

Page Columns Layout

Many of the columns viewable on this page are optional. The school administration can click on the page options at the bottom of the page to change the page policies. See PLS - Page Policies manual for Administrators¹⁾ for more information.

- **Standard View** – school administration can choose which columns to display. Options are:
 - o Student State Identifier #
 - o Local ID #
 - o Student Name
 - o Grade Level
 - o Track of Enrollment
 - o Street Address
 - o City
 - o Zip
 - o Phone
 - o Birthdate

- Counselor Overview Option
- Mig (Migrated in RW or in PLS)
- **Activity View** - shows educational activities students have listed on the portal learning logs. If students are enrolled in Online Learning classes, shows amount of time engaged in online learning per subject and number of activities submitted as complete. If students are enrolled in site-based classes and teacher claims positive attendance, this is also noted as activity. Click on activity icon to specific information:

Options per Student

To work with a student’s file, click on the blue triangle to expand the view. You can have multiple student folders expanded at one time. You can also expand all students by using the Expand/Collapse Students (see Part I - 1.). When a student’s file is expanded the triangle points down. Options/Information in this view:

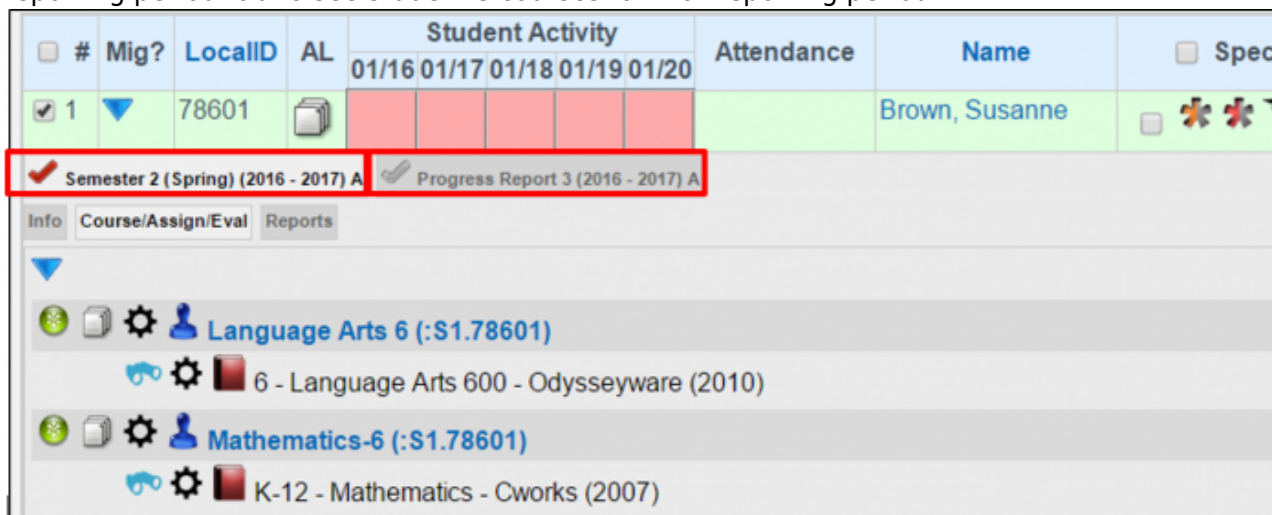

1. The reporting period your date range is set to.

Date ranges are chosen at the very top of the page. The date range defaults to today’s date unless you manually change it. It will hold your manually set date range until you log out of the program. You can choose to filter by Reporting Period date range (eg: Fall Semester/Spring Semester) or leave the Reporting Period/Date Range set to “Filter by Date Range” and use the FROM and TO date fields to span different times of the school year. Depending on the what date ranges you set, different “reporting periods” will show in your student folders. If you want to access records from a previous school year, set the FROM date field to a date in last year’s school date range or choose the previous school year filed at the top. If you want to see a student’s file in the future, set the FROM and TO into the future. The wider you set your date ranges, the more information you will see on your students.

| Roster Options | |
|------------------------------|----------------------|
| Reporting Period/Date Range: | Filter By Date Range |
| From: | 09/05/2011 |
| To: | 05/31/2012 |
| Schooltrack: | -- All -- |

With the date range set to the entire school year, you see all reporting period tabs. Click on a reporting period tab to see student’s courses for that reporting period.

2. The Course/Assign/Eval tab - the system defaults to this view

This tab contains all course/class information in the student file.
