Contact Manager

[2017-03-01_14.03_webinar_-_contact_manager_ls_gtm_.mp4](#)

Contact Manager is a tool all staff can use to track comments/contacts with students and their families. Contact lists are automatically created for teachers that have an association with the students through homeroom or as independent study supervising teachers. Quickly allows staff to note time, focus, and outcomes of any meeting with any student. In addition, there is an option to send notifications to specific individuals, regarding the specific contacts.

The **Student Engagement** feature integrated into **Contact Manager** allows a school to track any instructional sessions for any student across time. Any staff member who deals with any student can leave brief information regarding:

- Time spent with the student (minutes, hours). This can be documented in the past or automatically in the present.
- Any type of educational activity can be tracked: phone, in-person, class time, small group instruction, tutoring, email, etc.
- Time and subject matter information can be left for every student in a class or for an individual student.

Depending on permissions set, some users will be able to view all contact lists while others will be able to only view the homeroom teacher's/independent study teacher's contacts if they too teach the student.
