

Security Settings

Please remember these important facts when working in the SIS.

The SIS currently enables two menu styles, Classic and Modern. These Manuals are constructed with the Modern Menu in mind. If using Classic, the locations of certain procedures may vary.

Admin>>Settings>> Security>Security

Definitions

- A.** List of publicly Available Pages – shows a complete list of pages parents and students can access through the portal or REG-Online.
- B.** Staff Information – Takes you to a list of staff members. Same as Administration>Staff List
- C.** Define Security Groups - List of default security groups and the ability to make customized security groups. (See page 2 of this manual.)
- D.** Student Logins/Users - Creates a list of students and passwords using various sort functions. Printable list [See “Viewing Students/Parents Logins” manual for this section]
- E.** Parent Logins/Users – Creates a list of parents in system with various sort functions, the students that are linked to them, and their password. Printable list [See “Viewing Students/Parents Logins” manual for this section]
- F.** Define Users – shows individual users, their username, password and permission groups set. See page 4 of this manual.
- G.** Automated Setup for Logins/Passwords – Allows you to create an email message and send out usernames and passwords to users. [See “Automated Setup for Logins/Passwords” manual for this section]
- H.** Deletion Log – Searches for records that were deleted per username, IP address, page, and any other information available.

Detailed explanations of above areas

Define Security Groups

Security groups are labeled with a common name that describes a user type. For example, the user group “Attendance Administrator” would be the person at the school who needs to access the areas of the SIS that have to do with attendance. There might be one or several people who “members” or belong to the same group. The group is already set with all the permissions required settings. As another example, for the group “Teachers-Classroom Instructors,” that a teacher would need to

perform their basic duties are included in this group. All classroom teachers would need to be added to this group as “members” so they can do their job without interruption.

A default security group is created by School Pathways, Schools cannot change these groups. You can only enroll members. *If a group is not set to your needs, you can create your own group by doing the following.*

- Step 1. ADD NEW GROUP
 - Add a new title for the group
 - Set the group type: most should be set to private so only school employees can use it
 - Set the User type: typically staff
- Step 2. Once your group is titled, you can set the permission for the group. Find your group in the alphabetical listing and click on “Set Permissions”\In this page view, the pages are listed in the right-hand column. In some instances, a definition of the page is in the left column.
 - Clicking on the page element will often take you to the actual page so you can see what the page refers to.
 - The icon will take you to a list of users currently have permissions to use the page.
 - Check the pages you want to include in this group and click SET
- Step 3. Choose Members

Choose a member on the left and SAVE CHANGES to move to the right. When members are on the right side of the page, they are in the group. If you want to remove them from the group, check their name on the left and then click SAVE CHANGES

Define Users

Users must be added to the system and linked to their registration record. Student and parent records will automatically link to the user name but staff members must be linked manually. Current staff accounts that are linked will show in the Define Users area. If you need to view the unlinked accounts or disabled accounts, change the settings at the top left of the page and click UPDATE.

In the above view,

- Clicking on the staff member’s name takes you to theirs staff record
- Clicking on the Set Details link shows the current username and password. If the username and password are not shown, you can click to EDIT LINKED TO button and choose a staff member to link the login to.
- Clicking on jump logs you out and logs in as the user
- Clicking on (Set Groups) allows you to add a user as a member to a group
