## Test Registration System - Administration - CAASPP

1/18/2017 Webinar Wednesday video reviewing the CAASPP Test Registration System. For more Webinar Wednesday videos, [click here](#).

The Test Registration System allows you to organize your testing locations/events, students taking tests, site coordinators, and proctors managing tests for CAASPP testing. After the system is set to your specifications, teachers can help register students for specific test sites/events. There are also options for mass registration of students utilizing the compliance report. In addition, if you are District school, everything can be set up at District Level and then copied to the individual Child Scopes.

## CAASPP ADMINISTRATION

### CAASPP Registration Windows / Basic Information

Test Administrators set-up Registration Windows which will allow teachers to register students during the designated registration window only. Only Administrators will have over-ride capabilities when it comes to student registration after the close of the registration window.

Create a letter that your teachers will see when they start the registration process. Also enter the date registration starts and the registration end date. Check box when you want these details to display to staff. SAVE.

Delete Reg Window will delete all events, registrations & test attendance for that particular window. **It is important to delete the old reg windows and create a new reg window when starting the new school year so you have a clean slate. Do not edit dates on reg windows for a new school year.**

**NOTE:** Once the registration window is closed, teachers will not be able to register students. Test Coordinators will still be able to register from the Compliance Report

### Questions to Ask

The “questions” are meant to help teachers with test registration. Because the CAASPP testing dates are only open to certain students in certain grade levels, you might think of this as you create your questions. You can add as many questions as you wish. You can also edit your questions. Questions are not required. Some samples of questions you might ask are below. Click “Add another question”, enter question, SAVE. (Questions can also be deleted from this screen).

Set answers to your questions or edit the question.

### Test Event Locations

Click on 'Add new location' to start adding rooms/buildings. If you are a school, add all the rooms you will be testing in. If you are an independent study program, you may be adding places like Memorial Hall, a community library, and a day care center. Make sure to add the address of these places. Add all basic information and then SAVE. Edit any location by clicking the EDIT for Location.
